TOP SECRET Attach. #1 1406-CAGWU (s.c.)

Translation of Interrogation Report

In February 1952, a Communist Party member of the town of Brissarae (HTRegale B-27) by the name Nickolas (PA) Giorgis of Saint Nickolaos visited the village of Kakavia (HTRegale J-3134) and addressed the people as follows:

Lately the Greeks have dropped supplies of flour by air to the Seperi Area (HTRegale I-2883) which were collected and burned by the authorities. A number of leaflets were dropped with the flour informing the people that the supplies were intended for Party members and should not be interferred with by the people. It was emphasized by the speaker that these supplies were poisoned and that the people should take special care in the future not to touch them because the Greeks intend to poison the population.

The same person also mentioned that more drops would probably be made in the near future including small luxury items like fountain pens which should be considered very dangerous. The population did not believe that the above-mentioned supplies were poisoned and that they were intended to poison the people.

In the opinion of our source, the native population will turn in all the food supplies they discover to the Communist authorities because of the intense terrorism exercised by the Communists and the fear of reprisals.
